PROFESSIONAL SUMMARY

Passionate Artificial Intelligence and Data Science undergraduate with hands-on experience in software development, machine learning, and computer vision. Experienced in building intelligent and real-time applications through academic projects and AI internship, with strong problem-solving skills developed through Data Structures and Algorithms. Passionate about building scalable software solutions that solve real-world challenges.

EDUCATION

- B V Raju Institute of Technology, Hyderabad** Aug 2023 – Present
B.Tech - Artificial Intelligence and Data Science CGPA: 8.62/10
- Deeksha Junior College** 2021 – 2023
12th - Intermediate Course, Telangana CGPA: 9.15/10
- ST.Ann's High School** 2021
10th - Secondary School Certificate, Telangana GPA: 10/10

PROJECTS

Face Recognition Attendance System

Python | OpenCV | Dlib | Pandas

February 2026

- Developed a real-time automated attendance system using face recognition and computer vision techniques for accurate student identification.
- Integrated liveness detection, facial embeddings, and majority voting mechanisms to prevent spoofing and improve recognition reliability.
- Automated attendance record generation and management using Python, Pandas, and structured data processing.

ParkEase – Smart Parking Management System

JavaScript | QR Scanning | SQLite | UPI Integration

July 2025

- Developed an automated parking platform with QR-based vehicle entry, billing, and exit management.
- Implemented real-time slot allocation, shopping bill validation, and automated parking fee processing.
- Integrated barcode scanning, UPI payments, and SQLite database management for seamless user experience.

Satellite Data Compression Using AI

Python | TensorFlow | Autoencoders

January 2025

- Developed an autoencoder-based deep learning model for efficient satellite image compression.
- Evaluated compression performance using PSNR and MSE metrics to ensure high-quality image reconstruction.
- Optimized the model for high-resolution Earth observation datasets to improve storage efficiency.

EXPERIENCE

Tech Lead Intern

May 2025 – Jul 2025

Viswam.AI | IIT Hyderabad | Swecha | TASK | Meta

- Worked on Indic NLP and Automatic Speech Recognition (ASR) pipelines for Telugu-centric Large Language Models.
- Contributed to Indic NLP, ASR, and RAG-based AI systems by working on dataset preprocessing, prompt engineering, and multilingual language model workflows.

SKILLS

- Programming Languages:** Python, Java
- Web Development:** HTML, CSS, JavaScript
- Tools and Technologies:** Git, GitHub, VS Code, Google Colab
- Databases:** MySQL, MongoDB, SQLite
- Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, DBMS
- Soft Skills:** Leadership, Teamwork, Communication

CERTIFICATIONS

- Artificial Intelligence:** IIT Kanpur
- Python:** Infosys SpringBoard
- NPTEL:** Soft Skills

ACHIEVEMENTS

- Smart India Hackathon 2024:** Selected among the top teams from BVRIT for National Final Round evaluation, developing innovative solutions for real-world challenges.
- LeetCode Problem Solving:** Earned 50 Days and 100 Days badges through consistent Data Structures and Algorithms practice, demonstrating strong problem-solving skills.
